## IN THE CLAIMS

Please amend the claims as follows:

1.      (Currently Amended) A method comprising communicating with a notebook computer over a wireless personal area network (WPAN) to cause the notebook computer to ~~synchronize~~ ~~information in a personal information manager~~ send email over a network other than the WPAN, the email having been previously composed and stored on the notebook computer.

2.      (Original) The method of claim 1 wherein the network other than the WPAN comprises a wireless local area network.

3.      (Original) The method of claim 2 wherein the wireless local area network comprises an 802.11 compliant network.

4.      (Original) The method of claim 1 wherein the network other than the WPAN comprises a wireless wide area network.

5.      (Original) The method of claim 4 wherein the wireless wide area network comprises a General Packet Radio Service (GPRS) network.

6.      (Original) The method of claim 1 wherein the method is performed by a handheld communications device.

7.      (Original) The method of claim 1 wherein communicating with a notebook computer over a wireless personal area network comprises communicating with a Bluetooth compliant protocol.

8.      (Currently Amended) A method of synchronizing information in a portable computer with information in a corporate network server comprising:

**AMENDMENT AND RESPONSE UNDER 37 CFR § 1.111**

Filing Date: March 31, 2004
Title: REMOTE OPERATIONS USING WIRELESS PERSONAL AREA NETWORK

receiving <u>at the portable computer</u> a request over a wireless personal area network (WPAN) to ~~connect to a network~~ <u>search for networks</u> other than the WPAN<u>, the request originating from a handheld WPAN enabled device</u>;

<u>notifying the handheld device of the existence of a network other than the WPAN</u>;

<u>receiving at the portable computer a command to connect to the corporate network server using the network other than the WPAN, the command originating from the handheld WPAN enabled device</u>;

connecting to the <u>corporate network server using the</u> network other than the WPAN in response to the ~~request;~~ <u>command; and</u>

~~responding to the request over the WPAN; and~~

synchronizing <u>the</u> information ~~in a personal information manager~~ <u>in the portable computer with the information in the corporate network server</u>.

9-11.    (Canceled)

12.    (Currently Amended) The method of claim 8 further comprising notifying ~~a device that made the request~~ <u>the handheld device of the synchronizing</u>.

13.    (Canceled)

14.    (Currently Amended) The method of claim ~~13~~ <u>8</u> wherein the ~~request~~ <u>command</u> to connect to a corporate network <u>server</u> comprises connecting using cached credentials.

15.    (Currently Amended) The method of claim 8 wherein the ~~request~~ <u>command</u> includes a ~~request~~ <u>command</u> to connect to an access point in a wireless local area network.

16.    (Currently Amended) The method of claim 15 wherein the ~~request~~ to connect to an access point comprises connecting to an 802.11 compliant access point.

17.      (Currently Amended) The method of claim 8 wherein the ~~request~~ command includes a ~~request~~ command to connect to a wireless wide area network.

18.      (Currently Amended) The method of claim 17 wherein the ~~request~~ command to connect to a wireless wide area network comprises connecting to a General Packet Radio Service (GPRS) network.

19-22. (Canceled)

23.      (Currently Amended) ~~An apparatus including a medium to hold machine-accessible instructions that when accessed result in a machine performing:~~ A computer readable medium encoded with computer executable instructions that when executed by a mobile device result in a mobile device performing:

         communicating with a notebook computer over a wireless personal area network (WPAN) to cause the notebook computer to ~~synchronize information in a personal information manager~~ send email over a network other than the WPAN, the email having been previously composed and stored on the notebook computer.

24.      (Currently Amended) The ~~apparatus~~ computer readable medium of claim 23 wherein the network other than the WPAN comprises a wireless local area network.

25.      (Currently Amended) The ~~apparatus~~ computer readable medium of claim 23 wherein communicating with a notebook computer over a wireless personal area network comprises communicating with a Bluetooth compliant protocol.

26-29. (Canceled)

30.      (Currently Amended) A method ~~comprising~~ of communicating with a notebook computer over a wireless personal area network (WPAN) to cause the notebook computer to download email over a network other than the WPAN[[.]], the method comprising:

<u>sending from a WPAN enabled handheld device to the notebook computer a request to search for networks other than the WPAN;</u>

<u>receiving at the WPAN enabled handheld device from the notebook computer an indication of a wireless local area network; and</u>

<u>sending from the WPAN enabled device to the notebook computer a command to download email over the wireless local area network.</u>

31-32.  (Canceled)

33.     (Currently Amended) A method comprising:

<u>searching for a network connection other than a wireless personal area network (WPAN);</u>

<u>notifying a handheld device over the WPAN when a network other than the WPAN is found;</u>

receiving <u>from the handheld device over the WPAN</u> a request ~~over a wireless personal area network (WPAN)~~ to connect to [[a]] <u>the</u> network other than the WPAN;

connecting to the network other than the WPAN in response to the request;

responding to the request over the WPAN; and

downloading email.

34.     (Previously Presented) The method of claim 33 wherein the request includes a request to connect to a corporate network.

35.     (Previously Presented) The method of claim 34 wherein the request to connect to a corporate network comprises connecting using cached credentials.

36.     (Currently Amended) ~~An apparatus including a medium to hold machine-accessible instructions that when accessed result in a machine performing:~~ <u>A computer readable medium encoded with computer executable instructions that when executed by a mobile device result in a mobile device performing:</u>

communicating with a notebook computer over a wireless personal area network

(WPAN) to cause the notebook computer to <u>search for a network other than the WPAN and

notify the mobile device as to the existence of the network other than the WPAN; and</u>

<u>commanding the notebook computer over the WPAN to</u>download email over [[a]] <u>the</u>

network other than the WPAN.

37.      (Currently Amended) The ~~apparatus~~ <u>computer readable medium</u> of claim 36 wherein the

request includes a request to connect to a corporate network using cached credentials.
